1988 ANNUAL SUPPLEMENT

INDEX AND REFERENCE LIST

Title Index 1
Author Index 5
Subject Index 7
Periodical List 11

INDEX

This is the annual index for DATA PROCESSING DIGEST for the year 1988, Vol. 34, Nos. 1-12. The index is divided into three sections: the list of titles as they appeared in the Digest, a list of authors, and a subject index. All articles have at least one subject citation. Italicized titles are books, periodicals or reports. The numbers following the entries indicate issue and pages in which the item is found. The number preceding the hyphen is the issue; the numbers following the hyphen are the pages.

TITLE

Abstract Data Types and Algorithms, 12-34
The Achilles Heel Of Information Security, 12-14
Advanced CICS Design Techniques, Concepts and Guidelines, 2-29
Advanced COBOL, 2-30
Advanced Computer Architectures, 2-25
Advanced Computing For Medicine, 1-25
Advances In Electronics Spur Interest In Neurocomputers, 4-24
The Advantage Of TOP, 3-21
AI In the IC, 9-10
AI Joins the Working World, 2-22
All TPIs Are Not Created Equal, 11-12
All Your Assets On-Line, 9-1
Analyzing the Warranties In a Computer Contract, 1-5
Another Angle: The Software Upgrade Dilemma, 3-6
Application Maintenance On a Micro: Austec's RM/COBOL-85 Revisited, 7-15
Application Or Misapplication?, 11-6
Approach Your Hot Site As Home Away From Home, 9-7
Architecture and Applications Of the Connection Machine, 11-25
Architectures For Financial Consolidation: A Comparative Study, 3-13
Are Your Clients Prepared For Computer Disaster?, 5-20
Are We Doing the Best We Can With Our Office Systems?, 5-12
Artificial Intelligence In Manufacturing, 7-23
Artificial Intelligence and Software Engineering: A Survey Of Possibilities, 7-14
Assembly Language Programming for the 68000 Family, 10-26
Assuring the Quality Of Automation Equipment, 11-22
At the Heart Of the Matter, 11-11
Audit and Review Of Program Source Code, 2-18
Auditing Local Area Networks: Concepts, Skills, and Procedures, 3-16
Auditing the Maintenance Of Software, 2-27
Auditing Terminal Use, 10-20
Authenticating Users By Word Association, 6-22
Automating For Inventory Control, 12-33
Automating the Small Law Office, 3-23
Automating the Small Law Office, Part II: Implementing Office Automation, 5-16

Barriers To the Implementation Of CAD/CAM Systems, 10-20
"Be Prepared" To Recover, 7-9
Beyond Chief Information Officer To Network Manager, 12-9
Beyond MRP To Competitive Flexibility, 4-19
Biometrics—Getting Computers To Identify People, 4-13
The Birth Of Banking's Knowledge Systems, 4-23
The Birth Of an Information System, 1-27
A Blueprint For the New IS Professional, 1-4
Boosting Performance With Capacity Planning, 8-18, 9-6
Bring Productivity To Planning: Tools Needed To Capture the "Force," 5-6
Build It Right the First Time, 5-9
The Building Blocks Of ISDN Are In Place and the Network Will Evolve Through the Demands Of Users, 4-16
Building a Foundation For Presentation Manager, 8-16
Building Quality Into Systems, 12-15
Building Secure Worldwide Communications Networks, 12-13
The Bus Wars: Much Ado About Nothing, 12-30
A Business Approach To Cracking the Applications Backlog, 2-11
Business Graphics: More Than a Pretty Face, 10-22
Business Squeeze Pushes Software Sales Up 184%, 11-14

C-ing Into the Future, 11-14
C-Serpents and Other Myths: Implementing a Computer Solution, 12-1
Can You Rely On the Other Guy?, 6-5
Capacity/Performance Management: A Success Story At Chase Lincoln Bank, 6-2
A CASE For Reverse Engineering, 9-16
Case Implementation: Special Report, 6-9
The CASE Of the Artful Dodgers, 5-8
A CASE Of Culture Shock, 6-11
Case Technology and the Emperor's New Clothes, 10-1
Catching Disasters Before They Happen, 6-5
CD-ROM and Security—New Technology, New Problems, New Solutions, 5-19
The Chain Of Command, 3-9
The Challenge Of EDP Auditing, 5-19

The Changing Approach To Systems Planning, 9-3
Chargeback Methodology For Systems, 7-7
The CIM Connection: Reaching Out to the Shop Floor, 8-9
CIO: Misfit Or Misnomer?, 10-9
COBOL Wizard: A Wiley Programmer's Reference, 3-26
College Survey: Are VDT Operator Complaints Real?, 10-22
The Coming Of Age Of the Interactive Code Analyzer, 11-16
A Competitive Strategy For the Rest Of Us, 6-1
Completing the Software Development Loop, 1-17
Computer Audit and System Development, 4-11
Computer-Based Crime Countermeasures For Your Bank, 4-12
Computer Crime Law: A Capitalist Tool?, 1-1
Computer Fraud: What You Can Do To Prevent It, 9-12
Computer Systems Acquisitions and the Use Of Performance Bonds, 3-8
Computer Viruses—Are They a Threat To Business Continuity?, 10-16
Computer Viruses Can Be Deadly!, 9-11
Computer Viruses: A Contemporary Affliction, 12-12
Computer Viruses: Threat Or Media Hype?, 10-15
Computer Viruses—Where They Come From and How They Work, 9-11
Computerizing the Human Element, 7-21
Computers—Fall 1987 Survey Update, 3-24
Computers—Summer 1988 Survey Update, 11-24
Computers—Winter 1988 Survey Update, 5-4
Confronting the Software Crisis, 4-3
Contemporary Data Security: A Leadership Vacuum, 5-17
Controlling Emerging Technologies: The Need For a New Partnership, 12-13
A Cooperative Effort—Sharing the Processing Load, 1-18
Copyright Protection For Computer Software Visual Displays: Protecting a Program's Look and Feel, 4-14
Corporate, US Security Up For Grabs?, 4-11
Creating a Vision and Selling It, 12-11
Critical Issues In Networking, 2-15
The Crucible Of Analysis, 11-9
Customer Satisfaction and Capacity Planning, 2-9

Data Base Implementation For the Next Generation Of CIM Systems, 2-21
Data Dispersal Starts As Trickle, 5-4
Data Needs and Options That Help End-User Computing, 12-23
Data Prototyping, 9-10
Data Redundancy and Credibility, 7-17
Dealing With User Management, 5-13
The Decline and Fall Of the American Programmer, 9-13
Defining What a 4GL Really Should Be, 1-22
Demystifying Applications, 2-24
Departmental Computing: Getting the Definition Straight, 1-7
Designing Usability In Systems: Driving For Normalcy, 7-9
Developing a Computer Fraud Protection Plan, 7-25
Developing A Corporate Charter For CIM, 8-11
Developing Workgroup Systems, 9-8
Developments In Copyright Protection Of Computer Software, 6-14
Dial-Up Communication Lines: Can They Be Secured?, 10-16
Digital Paper—Does It Sound Explosive?, 10-26
Diplomatic Ties: Managing a Global Network, 7-8
Disaster Recovery Planning For Distributed Systems, 8-3
Discord Impedes Network Control, 5-21
Dispelling Some Myths About People and Technological Change, 1-12
Diversity Highlights ACR Conference, 8-19
Documentation: A Blueprint For Excellence, 9-21
Don't Simulate Without Validating, 3-20
The Dynamics Of Prototyping, 10-3

E-Mail To Anywhere, 5-24
EDI Comes Of Age, 3-19
EDI: Not Just a Giant's Game, 4-19
EDI Order Processing For Automotive Suppliers, 9-25
EDI Poised For Expanded Role In Manufacturing, 12-31
EDI Takes Root, 11-19
EDI: Up and Running At Last, 12-31
The EDP Auditor's Role In Ensuring Legality Of Computer Generated and Maintained Documents, 2-18

The Effective Information Center: Targeting the Individual User For Success, 3-4
The Electronic Business Information Sourcebook, 8-27
Electronic Emancipation: UIMS Free Users From System Complexity, 12-22
Electronic Spreadsheets: Improving Productivity and Control, 3-5
Electronic Systems Enhance JIT Operation, 3-17
Elegant Systems, 8-14
Eleven Questions Clients Most Frequently Ask About Computers, 10-14
11 Ways To a Faster Application Audit, 11-3
Emeraude Portable Common Tool Environment, 8-15
Engineering Change Control Systems—Their Time Has Come, 11-21
Ensuring Reliability and Integrity Of Data In EDP Application Systems, 8-25
Establishing Systems Department Credibility, 9-4
Ethics For Information Systems Personnel, 9-4
Evaluating Data Security: The Initial Review, 5-18
Evolutionary Development Of Decision Support Systems: Important Issues For Early Phases Of Design, 7-11
Executive Information Systems Make Life Easy For the Lucky Few, 5-25
Executives Shift the Data Balance, 8-2
Expansion and Control of End-User Computing, 3-3
Expert Systems: Are You Already Behind?, 6-17
Expert Systems That Really Work, 12-32
Exploiting Telecommunications Benefits, 7-5
Extending Ethernet Systems, 3-13

The Factory Of the 90s, 6-24, 8-13
Fatal Flaws In SQL, 11-13
File Organization and Processing, 6-26
The Fine Art Of Choosing Presentation Graphics Software, 8-23
The First Interstate Fire—a Business Recovery Plan That Worked, 11-1
Foolproof Requirements Definition, 11-10
Form Precedes Function, 11-9
Formalization In Programming Environments, 2-4
Forum Or Against 'Em?, 7-1
From Anarchy To Architecture, 6-11
From Concept To Prototype By Desktop CAD, 11-20
From Just-In-Case To Just-In-Time, 9-24
From Just-In-Time To Just-In-Case, 8-9
Further Developments In Copyright Protection Of the "Look and Feel" Of Computer Software: Recent Copyright Office Regulations, 10-25
Future Languages—Where Are We Headed?, 1-20
The Future Of CASE, 9-18
Fuzzy Concepts In Expert Systems, 11-23
Fuzzy Logic, 6-26

Getting CASE In Place, 6-10
Getting Corporate Data To the End User, 10-6
Getting the Facts On PC-Based Fax, 6-24
Getting Into Condition, 1-6
Getting Into VSAM: An Introduction and Technical Reference, 4-26
Getting Started In Data Processing Disaster Recovery, 10-17
Giving Applications New Life, 9-15
The Goals Of X/Open, 8-22
Good Contingency Planning Starts During System Development, 10-18
Groupware Takes Shape, 7-25
A Growth Industry That Nobody Wants To Join, 1-18
A Guide To Selecting CASE Tools, 9-17
A Guide To Systematic Data Gathering For a Warehouse Facility Design, 8-14
Guiding Distributed Systems, 2-13

Helical Scan Recording Sets Sights On Mass Data Storage, 5-3
Helping Others Become Comfortable With Technology, 10-13
Helping People Work More Effectively, 3-22
High-Speed Computers Of the Soviet Union, 11-24
How Artificial Intelligence and Expert Systems Technology Will Help the Auditor In Validating Accounting Information, 6-21
How CBT Makes Better Employees, 1-5
How Reliable Is Your Data?, 6-8
How Secure Are Fiber Optics Communications?, 10-17
How Security Can Improve Your Organization's Productivity, 1-7
How Some Users Cover Their Assets, 6-4
How To Choose the Right Accounting System To Specialize In, 10-14
How To Choose the Right Test Equipment, 4-18
How To Combat a Computer Virus, 11-2
How To Get Started In Computer Consulting, 10-13

How To Get Your LAN Installed, 6-15
How To Implement Project and Job Costing, 3-7
How To Improve Your Computer's Performance During Tax Season, 4-21
How To Make Local Area Networks Secure, 6-16
